General Engineering & Environmental Companies

General Engineering & Environmental Companies, INC (GEEC) personnel have completed over 500 projects in the industrial, petro-chemical, municipal, and public works fields. These projects are located throughout the Gulf South area ranging in size up to \$50 million. GEEC has developed particular experience in the fields of water, natural gas, and waste water systems; reinforced concrete structures; highways and bridges; sheet-pilings cofferdams; bayou, wetlands, and river crossings; cost estimating; and construction management.

ENGINEERING

GEEC maintains a Professional staff of Engineers with multi-state registrations that have successively completed over 500 major projects since 1992. GEEC provides its clients with a full range of services. Some of GEEC's relevant engineering experience includes river and reservoir outfall/intake projects, water/waste water treatment projects, pumping facility projects, heavy structural projects, marine structural and dock projects, and mechanical piping.

ENGINEERING

- Structural Engineering
- Mechanical Engineering
- Industrial and Plant Engineering
- Computer Aided Design and Drafting (CADD)

SURVEYING SOLUTIONS

Surveyors at GEEC take great pride in staying on the cutting edge of technological advances, and possess extensive experience on a vast variety of unique works. This preparation and zeal makes GEEC survey crews the right fit for any surveying project.

SURVEYING

- Hydrographic surveying
- Pipeline Surveying
- Global Information Systems (GIS)
- GPS Surveying
- 3D Scanning
- Arial and Video Surveying

Environmental Services, Spill Response, Restoration, and More

Based out of beautiful southern Louisiana, the team at GEEC has a natural affinity for the outdoors. This deep appreciation for the surrounding ecosystems means GEEC completes projects with passion and innovation. GEEC personnel have provided oil spill and management services on a multitude of major petroleum spill projects since 1996, and have used this experience to develop new and unique techniques. Ranging from wetland delineations to oyster reef restorations, GEEC has the job experience to affect positive change in sensitive environments.

ENVIRONMENTAL

- Comprehensive Technical Services
- Wetland Delineation and Determination
- SPCC Plans
- Biological Surveying
- Endangered Species Surveys
- Pollution Prevention Plans

OIL SPILL

- Oil Spill Management
- Operational Support
- Snorkel SCAT
- Scientific Support Teams for Oil Spills
- Incident Command Systems (ICS) Trained
- Marine Support

RESTORATION

- Design and Scientific Support
- Artificial Reef Restoration
- Oyster Reef Restoration
- Coral Reef Restoration
- Dune Restoration
- Marsh Habitat Restoration
- Barrier Island Restoration
